

DIGIT 150 CLING WHITE GLOSS

Product Information

Monomeric, electrostatic PVC Film (white gloss, 150 μ) laminated on an one-sided clay-pasteboard liner (180 g/m²).

The PVC offers a high dimensional stability.

Especially designed for short-term window decoration.

Designed to be highly resistant to solvent ink aggression during printing process and to guarantee very good printing performance on any solvent and eco-solvent based ink-jet printer.

Shelf Life

6 months when stored in the original packaging between 20°C and 25°C at 50% relative humidity.

Safety Data Sheet

When used under normal conditions, this product does not generate or release any dangerous substances or hazardous chemicals. This is a non-hazardous product in accordance with the current GefStoffV and EU criteria. Therefore it is not necessary to prepare a Material Safety Data Sheet for this product. The Safety Data Sheet serves only to comply with the regulation to supply information in accordance with REACH Regulation (EC) No. 1907/2006 and is available on request.

This product is not a hazardous product with regards to transportation legislation; neither does it contain substances that are hazardous to water within the meaning of the federal water act. After use, dispose of the waste product in accordance with the local / national authorities.

Technical Data

Carrier:	Monomeric, electrostatic PVC, (cling-film)
Thickness:	150 μ +/- 5 %
Adhesive:	./.
Adhesión [N/cm]:	./.
Liner:	one-sided clay-pasteboard (180 g/m ²)
Application temperature:	+10 - +40 °C
Service temperature:	- 40 - +80 °C
Outdoor durability:	6 months (unprinted film)

Standard Dimensions

1000 mm x 50 m
1370 mm x 50 m
