

POLI-TRANS®
340 NO TRIM LASER A4
341 NO TRIM LASER A3

POLI-TRANS
DESIGN YOUR OWN SHIRT

GENERAL USE

NO TRIM LASER - is a new and unique paper with no need to trim or weed. Produce high resolution transfers for application to light & pastel textiles. Transfers can be applied to cotton, polyester and poly/cotton textiles. Easy to apply giving a **soft and high quality** result on T-shirts, polo shirts and caps.

Always single sheet feed transfer papers. For use with all copiers and laser printers which use fuser oil and most oil free machines. **NO TRIM LASER** is manufactured to be used with graphics & letters - not photos (use laser light).

PRINTER SETTINGS

Set paper settings to heavy paper mode and mirror image. Settings on laser copiers and printers vary, therefore we recommend producing a test print first.

APPLICATION

Print selected image on the blank side of the transfer paper - **mirror image**. Trim around the design with scissors. Pre-heat T-shirt to remove moisture - 3 to 4 seconds.

- Press at 160 °C (320 Fahrenheit)
- Time 20 sec.
- Medium pressure
- Remove transfer after 8 - 10 sec.
- Cover with silicone paper and press for a further 30 sec.

WASHING

- Textiles should be machine washed inside out up to 40 degrees
- Do not tumble dry, dry clean or iron directly over transfer

All information given is for guidance purposes only. Many different factors are involved in producing transfers, therefore we recommend customers to perform their own tests. These instructions are not legally binding. Information given is subject to change without notice.
